PCT/EP 02/01751**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims	1 - 9	YES
	Claims		NO
Inventive step (IS)	Claims	1 - 9	YES

Industrial applicability (IA)	Claims	1 - 9	YES

2. Citations and explanations

1. This report makes reference to the following document:

D1: DE-A-31 05 065 (LICENTIA GMBH) 19 August 1982
(1982-08-19) mentioned in the application.

2. The application relates to a ceramic hob comprising a glass-ceramic hotplate.

3. D1 is regarded as the closest prior art. Document D1 discloses (see the abstract and Figure 1) a ceramic hob comprising:

- a hotplate (1) made of glass-ceramic (2),
- an electrical heating element layer (6),
- an insulating layer (5) (between the hotplate and the heating element layer),
and
- an electrically conductive intermediate layer (4) (between the hotplate and the insulating layer).

3.1. The subject matter of Claim 1 differs from D1 in that the intermediate layer is a thermally injected layer made of an electrically conductive ceramic.

The subject matter of Claim 1 is therefore novel.

3.2. As regards inventive step, the distinguishing feature improves the stability of the entire system (the coefficient of expansion of the materials used is similar to that of the hotplate) and ensures the requisite dielectric strength.

The problem to be solved by the present invention is therefore understood to be that of designing a ceramic hob with improved operating safety and long-term resistance in rough everyday operation.

The search report citations contain no hints whatsoever that could suggest the claimed construction.

The subject matter of independent Claim 1 therefore complies with the requirements of PCT Article 33(2) and (3).

4. The dependent claims are dependent on Claim 1 and therefore likewise meet the requirements of the PCT with regard to novelty and inventive step (PCT Article 33(2) and (3)).

5. The industrial applicability of the subjects of Claims 1 to 9 is beyond doubt. Consequently, Claims 1 to 9 also comply with the requirements of PCT Article 33(4).
